

APPENDIX CC

AIR TERMINAL IDENTIFIER CODES (AERIAL PORT CODES)

These codes identify the name and location of air terminals worldwide. The code (either three alpha characters or three alpha/numeric characters) representing the actual Aerial Port of Embarkation (APOE) and Aerial Port of Debarkation (APOD) is used on all Defense Transportation System (DTS) documentation for air shipments. The most current versions of air terminal identifier codes are available at the Table Management Distribution System (TMDS) website at: <https://TMDS03.scott.af.mil/>.
